YACHT REFIT & REPAIR RESIDENTIAL **AVIATION**

hand-made interiors – inspired by excellence

PASSION FOR PERFECTION

The name metrica stands for exclusive interiors around the world. On the water, on land and in the air. metrica has been equipping yachts as well as private homes and jets according to coherent overall concepts for years.

With metrica® Aviation INTERIOR, we have turned a specialised field into an independent company that will set new standards in luxurious interior outfitting of aircraft.

We are proud to be at the helm of many prestigious projects, lending each one an exceptional flair and the ultimate in finesse. Over 30 master craftsmen produce the exceptional results we have become synonymous with.
We are also constantly driven by our passion for perfection and for outstanding workmanship – from nose to tail.

Your metrica® Aviation INTERIOR team

A representative ambiance, a comfortable atmosphere or an inspiring work environment – we can implement your wishes even in the limited space offered by an airplane or helicopter.

With precision craftsmanship, attention to detail and a pronounced understanding of the particulars, we master unusual challenges. A team of artisans, interior architects and engineers work hand in hand.

We have experience with ultra-light and flexible materials as well as knowledge of how to combine design and functionality for optimum results. Whether we are included in the planning phase for a new project or are commissioned for refurbishment: metrica® Aviation INTERIOR creates one-of-a-kind aircraft interiors.

Aviation is an industry unlike any other. It requires experts that are familiar with the technical requirements and are always willing to accept new challenges.
metrica® Aviation INTERIOR has extensive experience and broad know-how in the following fields:

- Ultra-light material
- Technical specification
- The highest safety standards
- Innovative fabrication methods, e.g. moulded wood
- Continuous quality control

PEOPLE AND POTENTIAL

During the entire production process, we are your competent contact person from planning to final assembly.

We precisely implement the specifications of design agencies down to the selection of suitable accessories. In doing so, we create interiors appreciated by technicians thanks to their functionality and durability. And by passengers thanks to their special ambiance.
