

The intention of ALROUND – Association of Aerospace-oriented SME in Germany – is to integrate its members (SME, industry, institutes and research centers) into ambitious technology projects in aeronautics, space and other demanding fields of technology.

The tasks of the association are to protect members' interests and to enlarge the network of contacts. In addition, we support the members' information exchange.

Since 1988, ALROUND is servicing the needs of small and medium sized enterprises (SME) and supporting its members as service center in a broad range of activities. In 2006, these tasks have been shifted to the subsidiary company ALROUND Service GmbH.

And what can we do for you?
