

LIGHT WEIGHT CARBON LITERATURE POCKET

Being a supplier of all main cabin components, Pankl has developed a light weight Literature Pocket for the installation in the passenger compartment. Literature Pockets are fixed on rigid furnishings to allow the stowage of emergency instructions and any advertising material for passengers.

The Carbon made Literature Pocket can be fully customized according to customer demands and there are no limitations on dimensions, color, type of leather, etc.

The standard Carbon made Literature Pocket shows with ~175 g approximately half the weight of typically used Literature Pockets with a comparable price.

Standard Option:
