

Ready-to-install products Design options for seat covers

There are many ways to endow seat covers with signature looks. Lantal offers a broad spectrum of design options with the following key advantages:

- **Unique custom looks**
- **Creating accents and visibility**
- **Matching corporate design and leveraging brand recognition**

Seams

Whether in fabrics or leathers, whether decorative, colored to contrast, or tone-on-tone, seams add visual appeal to every seat cover. The pictures below show a selection of seams available from Lantal. Most of the seams are also available on laminated seat covers.

Decorative stitching

Double lap-felled seam with cross stitch

Plain lap-felled seam

Double lap-felled seam

Joining seam with piping

Midget seam

Leather design options

Leather can be customized in many ways to reflect your corporate identity:

Perforations

Perforations give leather a fresh, breathable look. They are punched all the way through the hide.

Dimples

Dimpling is another attractive design option. The holes are semi-perforated and do not extend through the full thickness of the hide.

Debossing

Embossing

Hides can be customized with specific full-surface or partial-surface textures, patterns or logos. Debossing pushes the image below the level of the leather. Embossing raises the design or logo above the leather.

Laminated seat covers

For improved seating comfort and enhanced looks, Lantal can also back the seat covers with various possible laminations. For leather a lamination with an activated carbon nonwoven (only on perforated leather), a lightweight foam (for backrest only) or graphite foam is possible, for fabric only graphite foam can be applied. For further information please inquire the relevant product information.

Further design options for seats

Striking visual effects can be created not only with seat covers, but also with Lantal's antimacassars or literature pockets. The following design options are possible:

Antimacassars

- Printed
- Embroidered
- Embossed (leather), debossed (leather, artificial leather)
- Decorative stitching

Literature pockets

- Selection of color
- Mesh aperture and structure
- Material thickness of the net
- Shape of the frame and material
- Embossing (leather), debossing (leather, artificial leather), embroidery on frame material
