

## Aircraft cabin flooring solutions

### Non textile flooring

removable and permanent adhesive tapes for ntf and galley mats.

#### **relink 2316ntf** **clean peel, removable ntf tape.**

An innovative, high performance solution for OEM and MRO ntf installation.

- Differentially coated double coated, with pet film interlayer, providing dimensional stability, plasticizer and moisture barrier.
- Permanent adhesive (open side), is specially modified to provide high adhesion to varying ntf backings, including GF and foam and also provides high plasticizer resistance.
- Clean peel removable off both flooring composite and various moisture barrier films, without residue or damage.
- Can be removed off various barrier films, without damage, saving time and money.
- Some careful reposition ability possible during installation process.
- Good processing qualities, to aid web lamination and cutting of pre-cut sets.
- Filmic liner provides, easy and quick one piece removal, every time.
- Low weight solution.
- Does not contain any ingredients on the Gray list, antimony trioxide, halogen and bromide free
- Qualified to FAR/JAR/CS 25.853(a) app.F part1, (a) (1) ii

#### **Prolink 130r** **AIRBUS qualified transfer adhesive for ntf construction and installation.**

A high performance transfer film, qualified to AIMS10-05-022, AIMS10-05-026, IPS10-05-022-02 & IPS10-05-026-02, designation ABS5768C & ABS5768E, for OEM and MRO ntf installation.

- Solvent free, pure acrylic, adhesive transfer film.
- Permanent, specially designed to provide high adhesion to varying ntf backings, gf re-enforcement layers, barrier films and composite floors.
- Provides very high adhesion to various ntf backings.
- Combination of high adhesion and high cohesion, will help creep.
- High adhesion will help prevent wrinkles, bubbling and shrinkage.
- Highly resistant to moisture.
- Good processing qualities, to aid web lamination and cutting of pre-cut sets.
- Weight saving solution.
- Thin, adhesive film to help prevent telegraphing.
- Does not contain any ingredients on the Gray list, antimony trioxide, halogen and bromide free.

**BIOLINK, technically, the right solution ....**
